Summary

Software Engineer with over a year of experience in Research and Development, contributing to the development of software for embedded and system-level applications. Experienced in designing and implementing software components, developing modular architectures, and improving the performance and reliability of existing systems. Proficient in C, Python, and Linux, with practical experience in hardware abstraction, networking, and firmware development. Adaptable and motivated to learn new technologies, with a passion for problem-solving and tackling complex technical challenges in dynamic, technology-driven environments.

Experience

Shanghai BDCOM Information Technology Co., Ltd.

Dhaka, Bangladesh

Software Engineer, Research and Development

Feb 2025 – Jul 2026

- Developed and maintained switch firmware features including L2 and L3 forwarding, QoS, Traffic Control, ACL, IP Tunneling, VLAN Management and SNMP on VxWorks and Linux based platforms using Realtek RTL93xx series chipsets.
- Designed layered abstractions for switch configuration, enabling hardware-agnostic support for networking features.
- Optimized forwarding-plane performance by analyzing and improving packet flow through the switching pipeline.
- Diagnosed and resolved firmware defects in networking modules, improving software quality and release stability.

Technical Skills

Programming	C, C++, Python
Networking	L2/L3 Switching, TCP/IP, UDP, VLAN, QoS, ACL, SNMP
Embedded	VxWorks RTOS, Linux, Hardware Abstraction Layer, RTL SDK
Tools	Git, Linux CLI, Shell Scripting
AI & ML	Deep Learning, Natural Language Processing, Data Science
Other	Kotlin, JavaScript, RDBMS, SQL

Education

Rajshahi University of Engineering & Technology

Rajshahi, Bangladesh

Bachelor of Science in Computer Science and Engineering

Feb 2019 – Apr 2024

CGPA 3.18 out of 4.00

New Govt. Degree College, Rajshahi

Rajshahi, Bangladesh

Higher Secondary Certificate, Science

Jul 2016 – Apr 2018

GPA 5.00 out of 5.00

Research & Publications

Network-Shield: Exploring the Efficacy of GRU Model in Intrusion Detection

ACM Digital Library

Md. Ashik Elahi, Rafi Ahammed Songram, Md Shahid Uz Zaman

2024

- Network intrusion detection system analyzing packet flow data across all attack classes in the CIC-IDS2018 dataset
- Published in the 3rd International Conference on Computing Advancements - ICCA 2024

Projects

CPU Design on Digital Software Simulation

2022

- Designed and simulated a 5-bit CPU supporting basic arithmetic operations and fundamental instruction execution.
- Implemented customized CPU parameters including word size, register count, RAM size, and instruction set architecture.

Sentiment Analysis from Text Data using Deep Learning

2023

- Developed a sentiment analysis system capable of classifying text data into six distinct sentiment categories.
- Evaluated the model for classification accuracy and robustness across diverse textual contexts.
